

# Why Unifize works the way Arena doesn't

Arena PLM + QMS helps companies manage product and quality data in one system. But its rigid workflows, dated interface, and lack of built-in collaboration slow down decision-making, adoption, and process improvement.

Unifize reimagines quality management for modern, connected organizations. Its AI-native, collaborative platform delivers the speed, flexibility, and real-time visibility teams need to accelerate compliance, innovation, and growth.

## Where Arena falls short

### Clunky user experience

Arena's interface feels outdated and hard to navigate. Simple tasks often require too many steps, slowing teams down and reducing adoption outside engineering.

### Inflexible workflows

Built-in processes are hard to adapt. Even small changes can require workarounds or admin support, making continuous improvement feel like a configuration project.

### Disconnected collab

Arena lacks real-time chat or contextual discussion. Teams rely on external emails and meetings, losing decisions outside the system and slowing resolution.

## WHAT MAKES UNIFIZE DIFFERENT

### Redefining what a modern QMS can be

Unifize isn't another eQMS, it's a new class of AI-native, collaborative quality management. Designed for how modern teams actually work, Unifize turns compliance from a checklist into a continuous, connected conversation across teams, processes, and data.

### Chat-driven collaboration

Every record becomes a living conversation where people, data, and decisions come together in real time for faster, more confident outcomes.

### Built for adoption and alignment

An intuitive, familiar interface brings every team together. Unlimited free collaborators make participation effortless across the organization.

### Rapid time to value

Cloud-native and no-code, it goes live in weeks. Teams can refine workflows independently for faster ROI and continuous improvement.

### AI-native architecture

All data lives in a single, connected model that powers automation, analytics, and insights. Teams gain predictive visibility without exports or add-ons.

# Why teams choose Unifize

Unifize replaces email threads, disconnected meetings, and spreadsheets with real-time collaboration inside every workflow. Teams see 4x faster change cycles, 70% fewer meetings, and 10x faster issue resolution because conversations and actions happen in one place.

## Comparing Arena vs Unifize

Category	Unifize	Arena	Why it matters
Core philosophy	👍 Collaboration-first: connects people, data, and decisions	👎 Record-centric: built for compliance and documentation	<b>Modern QMS must drive engagement, not just manage records.</b>
Process adaptability	👍 No-code, modular workflows configurable in minutes	👎 Predefined modules with limited customization	<b>Agility to evolve processes supports continuous improvement.</b>
Task management	👍 Unified “Manage View” across all processes	👎 Tasks handled in separate modules or outside the system	<b>Centralized visibility improves accountability.</b>
Implementation speed	👍 Go live in weeks, no consultants	👎 Guided onboarding, multi-month setup	<b>Faster ROI and less friction during rollout.</b>
Mobile & offline access	👍 Full-featured PWA with offline sync	👎 Limited mobile experience, no offline access	<b>Keeps quality moving across remote and shop-floor teams.</b>
AI capabilities	👍 Unified data model powering automation and analytics	👎 Basic workflows, limited to manual tracking	<b>Intelligent automation improves decision-making and audit readiness.</b>
Scalability beyond QMS	👍 Extends to PLM, CMMS, FSM, and EHS	👎 Focused on product and quality workflows only	<b>Enables integrated operations as the business grows.</b>

## Key takeaway:

Unifize replaces Arena's rigid, product-first approach with a flexible, conversation-driven platform that brings quality, collaboration, and change management together in one place, helping teams move faster with less effort.
